Re: Nestlewood Solar - Project Update

Dear Recipient,

Nestlewood Solar plans to start commercial operation of its 80-megawatt solar generating facility on or around December 27, 2023.

Final restoration activities related to the completion of project construction are anticipated to continue into the spring of 2024. These activities will include cleaning up the site and removing all construction equipment. Final road repairs are expected to occur after weather warms up in the spring.

Attached to this letter is a copy of the updated Nestlewood Solar I Complaint Resolution Plan.
